1. Changsheng 1.5kw water-cooled spindle motor for woodworking advertising should be used with the inverter. The specifications and parameters of the inverter should match the parameters of the spindle motor. If the settings are incorrect, the spindle motor will get burned.
2. Before the use of this [router spindle motor](#), users should ensure that the cooling circulation system of the spindle can work normally, and it is strictly prohibited to use it without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Therefore, the customers should run the spindle motor at a low speed before the first use.
