1. Changsheng 3.2kw (Φ100\*220) woodworking advertising water-cooled spindle motor should be used with the inverter that matches the parameters of itself. If these settings are incorrect, the spindle motor will be burned.
2. Before use, the water-cooled spindle motor must ensure that the cooling circulation system is working normally, and it is strictly prohibited to use the [router spindle motor](#) without sufficient cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change, and the customer should run the spindle motor at a low speed before use.
